>Business Parties/Find

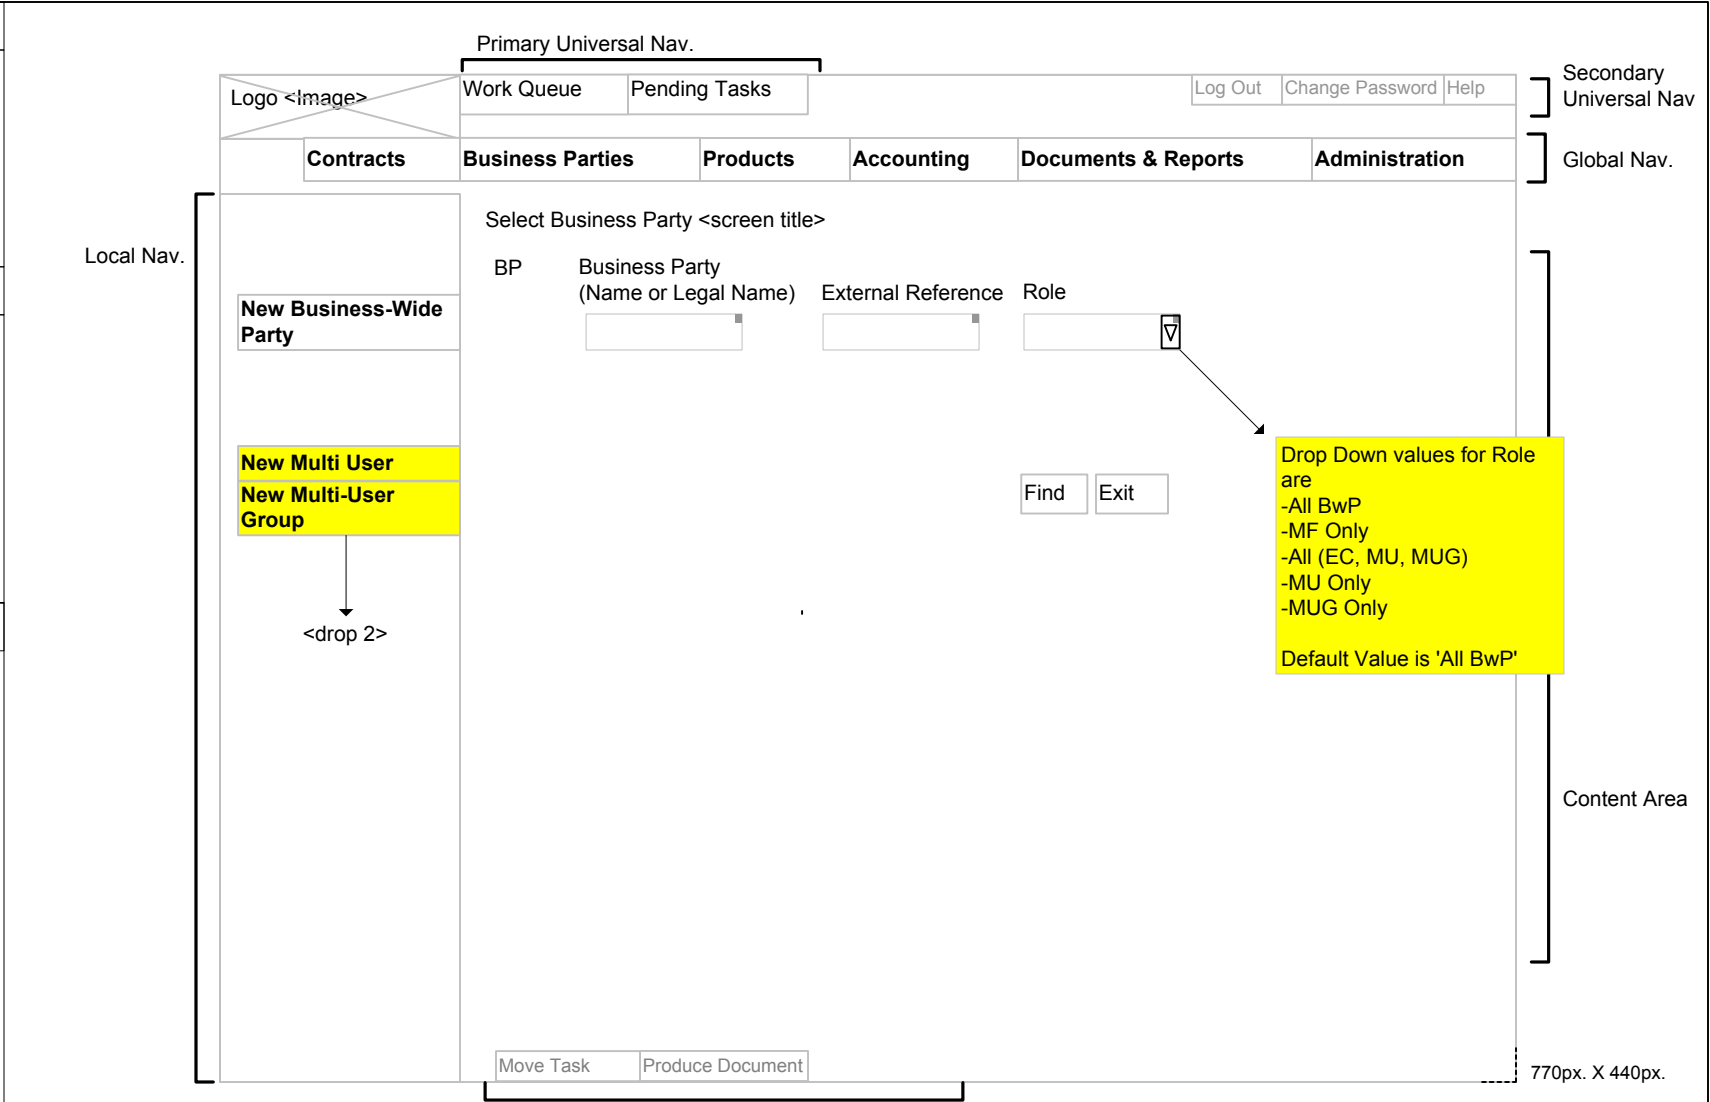

Users:

UC 24 Select Business Party

Notes:

1. There is no user sorting on search results, results are sorted by business name (C5) as default.
2. Total number of Business Parties is in the order of hundreds not thousands. If results >100 user is presented with first 100 with message to refine search. (IS THIS STILL VALID)
3. Business names may have multiple entries all beginning with same word so need to have wide viewable field for business name.
4. Use single scrollable list of results, no multi-paging required.
