Introduction

The "illy" global web site redesign covers development of a new user experience for "illy" web sites globally, including:

This document is split into four major sections :

site map : which serves as the overall foundation and navigation schema for the web-site

experiential templates : these templates serve as the presentation mode for the "coffee & experience" sections, and will be primarily flash based

information based templates : these templates serve as the presentation mode for the "about illy & illy professional" sections, these will house dynamic content and will be database driven html pages.

e-commerce templates : these templates serve as the presentation mode for the "shop" sections, the recommendation is that the content for this area be re-purposed and be fit into the navigation structure that is presented in this document.

Core Audience: Coffee connoisseurs the world over, Baristas, other coffee professionals, art lovers (those intrigued by and interested in art, and collectors).

Main Objective: Developing a site that is consistent with the "illy" philosophy, visual language and brand.

Launch Date: June 2006
